

CAUTION: Important Warranty Information

Please take note that your doors require that you be responsible for the following or your warranty could be at risk.

- ❖ All doors require a finish on all six sides with-in 30 days of receipt.
- ❖ Exterior doors must have appropriate protection from the elements. Direct heat or sunlight can cause cracking, warping, discoloration and other undesirable problems.
- ❖ All wood doors are not shipped from the manufacturer ready to accept a finish and require that they be sanded appropriately for the desired finish that will be applied.
- ❖ Dark finishes require more sanding prep to limit the potential to see visual cross sanding marks that may be apparent from the manufacturer. Darker finishes may also require the use of stain conditioners or the use of solvent based stains to limit a blotchy appearance.

Warranty information for Lakeview Millworks products are attached to your delivery paperwork. If for some reason these did not accompany the door order: Please visit www.lakeviewmillworks.com and click the “Resources” tab.
